

Scientific topics of the Conference

- Application of products and structures of titanium alloys in aircraft engine construction and other branches of industry.
- Casting technologies.
- Additive technologies in production of products of titanium alloys.
- New alloys based on titanium and intermetallic compounds.
- Advanced technologies and equipment for production of ingots of titanium and alloys on its basis.
- Deformation processing of titanium.
- Structure and properties of titanium alloys.
- Advanced technologies of welding and brazing of titanium alloy products.

Working languages of the Conference

Ukrainian, Russian and English.

For participation in the Conference, please, fill in the registration form and send it to the Organizing Committee.

The Conference is organized in form of plenary and poster papers session. Proceedings will be published before the Conference start. Paper size is up to 6 A4 pages (size 12, 1.5 spacing, margin 2 cm from each side), including Figures, Tables and References.

The papers approved by the Organizing Committee will be published in «*The Paton Welding Journal*» and «*Sovremennaya Electrometallurgia*» Journal in issues of 2018 year.

To present the plenary paper, 20 minutes will be given. Demonstration of papers will be provided using the multimedia projector.
